Mantis

Walls and stands

these are excellent solutions allowing to present the brand without taking up large spaces, while giving the opportunity to quickly change the exposition. Perfect for various types of events, conferences or promotional campaigns. Can be used as a background for photos, or an unusual form of advertising at the point of sale. Can also be used in offices, during training sessions, industry meetings, as well as during trade fairs.

MANTIS

The Mantis textile stand is a very practical, small advertising wall from the Smart Display System. The lightweight and easy-to-assemble design allows it to be positioned properly in any space. If you are looking for a stand that you would like to set up in an office or smaller fair exhibition, Mantis is perfect for this role.

The frame folds very quickly thanks to the click system.

Thanks to the use of sublimation printing technology, your graphic design will maintain clear colors and will be much more durable than with traditional printing. You can even wash the printed fabric in the washing machine.

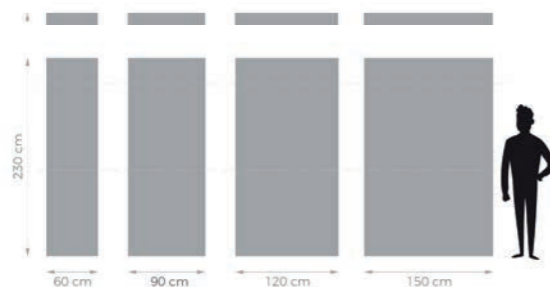

The material with graphics can be freely put on the aluminum frame. Stretch fabric fits well to the frame, which guarantees the aesthetic appearance of the stand.

Advantages of Mantis Smart Display:

- fabric stretched on the frame finished with a zip - the possibility of printing graphics on one or both sides
- assembly without tools
- lightweight aluminum construction based on tubes with diam. 32 mm

In the set you get:
complete Mantis Smart Display system and transport bag

Model	Index	Fabric dimension (width) x (height) cm	Weight structure with graphics
Mantis	MAN60	60 x 230	4.1 kg
Mantis	MAN90	90 x 230	4.7 kg
Mantis	MAN120	120 x 230	5.3 kg
Mantis	MAN150	150 x 230	5.9 kg

ELEPHANTO

The most popular textile wall based on the SMART DISPLAY system.

Elephanto gives a lot of freedom to create graphics, because this wall can have width from 2.5 to even 6m. Standard rectangular shape, with rounded upper corners of the wall.

The print on the fabric is very durable - so your graphic design will keep its clear colors, and in addition, if dirty, the fabric can be washed in the washing machine. The stretch fabric fits well to the aluminum wall of the Elephanto, thanks to which it retains its aesthetic appearance, even with repeated folding and unfolding the wall.

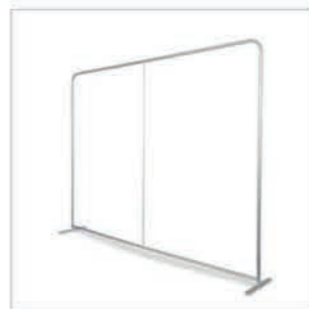

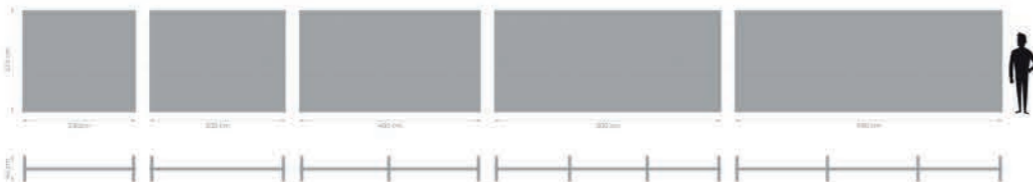

Advantages of Elephanto from the Smart Display system:

- very large graphic print area
- fabric with print stretched on the frame construction finished with a zipper lightning
- one-sided or two-sided graphics
- quick assembly thanks to numbered elements
- two metal feet

In the set you get:

A complete Elephanto Smart Display system and carrying bag.

Model	Index	Fabric dimension (width) x (height) cm	Weight structure with graphics
Elephanto	ELE250	250 x 225	9.2 kg
Elephanto	ELE300	300 x 225	10.9 kg
Elephanto	ELE400	400 x 225	14.2 kg
Elephanto	ELE500	500 x 225	18.4 kg
Elephanto	ELE600	590 x 225	21.6 kg

ELEPHANTO HEAVY

Elephanto Heavy in the Smart Display system is a reinforced version of our Elephanto wall. The lightweight, aluminum construction has wide feet. In addition, for larger sizes a third foot is added. Your graphics, printed on elastic fabric by the sublimation method, will retain vivid colors, thanks to which you can display your advertisement very well.

The fabric is machine washable, which even in the case of dirt makes it easy to use repeatedly. A solid frame on which the fabric with a zipper is tightened is very easy to assemble.

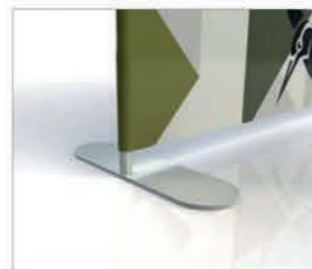

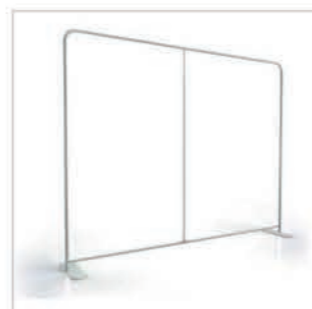

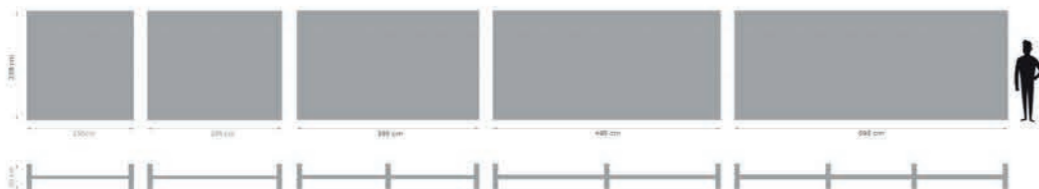

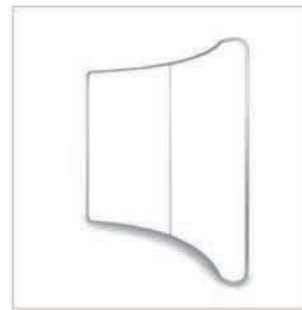

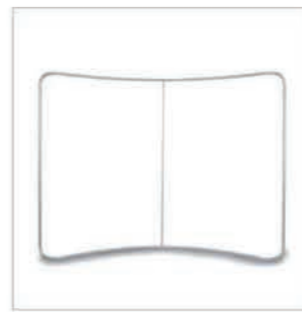

Advantages of Elephanto Heavy Smart Display:

- an extremely large graphic print area
- fabric with print finished with a zipper
- the possibility of one-sided or two-sided graphics
- numbered pipes of the wall structure facilitate assembly
- for models ELE40-H, ELE50-H and ELE60-H third foot added, giving additional reinforcement to the construction.

In this set you get:
Elephanto Smart Display and transport bag.

Model	Index	Fabric dimension (width) x (height) cm	Weight structure with graphics
Elephanto Heavy	ELE240H	235 x 238	12,3 kg
Elephanto Heavy	ELE300H	295 x 238	13,7 kg
Elephanto Heavy	ELE400H	395 x 238	16,3 kg
Elephanto Heavy	ELE500H	495 x 238	18,8 kg
Elephanto Heavy	ELE600H	595 x 238	20,3 kg

CAMELUS S

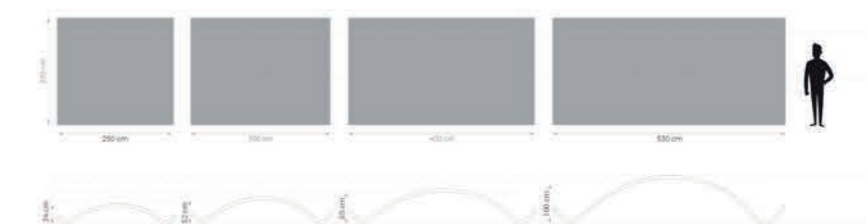

Camelus S curved horizontal textile partition wall from Smart Display system adds depth to your space advertising. The curved sides of the wall allow your graphic to be visible when looking from a side. The frame of the wall, thanks to the shape, does not require additional stabilizing feet. Fabric with graphics stretched over a rounded structure of the frame is completed with a zipper from the bottom, making it look aesthetically pleasing. The sublimation printing method allows washing fabrics in the washing machine.

Advantages of Camelus S Smart Display:

- fabric stretched over the structure and finished with a zipper sewn in from the bottom
- one-sided or two-sided graphics
- tool-free assembly
- easy assembly thanks to the numbered elements
- the structure of the frame does not require the installation of additional feet

The set includes: a complete Camelus S Smart Display system and a transport bag.

Model	Index	Fabric dimension (width) x (height) cm	Weight structure with graphics
Camelus S	CAMS250	250 x 230	8,2 kg
Camelus S	CAMS300	300 x 230	9,9 kg
Camelus S	CAMS400	400 x 230	13,2 kg
Camelus S	CAMS530	530 x 230	15,8 kg

DORADO

The Dorado wall is a model eagerly used for banner graphics with a larger surface or as a wall for photo sessions.

The structure is made of telescopic masts, which allow you to adjust the height and width of the wall for individual needs. Textile graphic, printed on one side, has tunnels into which the bars are inserted. Metal feet ensure the stability of the structure.

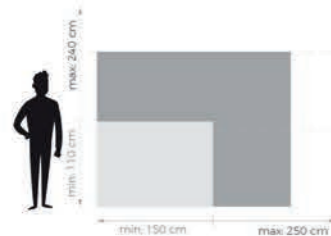

The Dorado banner wall is very easy to assemble, it only takes a few minutes to assemble it.

Advantages of the Dorado wall:

- stable, telescopic structure
- full height and width adjustment walls up to 250 cm
- one-sided graphics mounted on tunnels
- two metal feet

The set includes: a complete Dorado system and a transport bag.

Model	Index	Fabric dimension (width) x (height) cm	Weight structure with graphics
Dorado	DOR150/200	150 x 200	7.8 kg
Dorado	DOR200/200	200 x 200	8.1 kg
Dorado	DOR250/200	250 x 200	10.5 kg

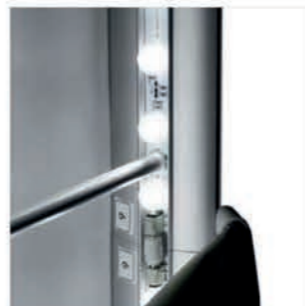

SMART FRAME GO!

Smart Frame GO! was created with a thought about the mobility and freedom of the advertising system. Smart Frame Go with LED lighting is a wall / a textile stand that will work at events trade fairs or company events. Exceptionally quick and easy assembly - individual elements connect the frames with a connector. High-quality printed fabric, adapted to the illumination from the inside. The set is packed in a bag on wheels, what allows convenient transport of the illuminated wall.

Advantages of Smart Frame Go!:

- elegant, silver frame profiles
- material on the front and back, possibility of printing graphics on one or two sides
- transport bag on wheels
- very quick assembly

Model / Index	Dimension (width) x (height) cm	Weight structure with graphics
SFGO100X200-TB-FT-SET	100 x 200	7,1 kg

Trade fair counters and conference tribunes

Advertising counters are a complementary element of a trade fair stand or an independent exhibition or sales stand.

They can be used as a display table, desk, customer service point or a tasting stand. They can also be used as a place to present advertising gadgets and company products.

A big advantage is their quick assembly, without using additional tools.

Advertising counters are a very helpful element during the exhibition of a promotional stand. They also work well as a conference stand.

ARIETE

A smaller, rectangular advertising counter based on the Smart Display system. Graphics are printed on a flexible fabric, which is stretched on an aluminum construction. Sublimation printing is extremely durable. The material is attached to the countertop by silicone elastics fastened to the countertop frame and base.

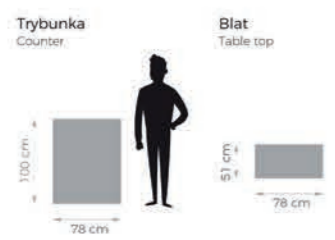

Aluminium construction provides stability while maintaining low weight of Ariete Counter.

The advantages of Ariete Counter:

- robust and stable construction
- fabric with high quality print
- quick and easy installation
- transport bag included

Model	Index	Fabric dimension (width) x (height) x (depth) cm	Weight structure with graphic
Ariete	ARI-PSS-SET	78 x 51 x 100	9.7 kg

CAPRA

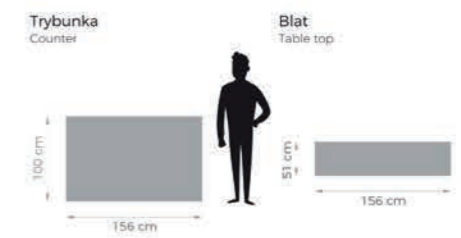

Capra display counter from the Smart Display system will be useful at larger events or corporate events or conferences. It is based on an aluminium construction, to which a printed fabric is easily attached. A big advantage of our exhibition counters is their quick assembly, without using any tools.

Advantages of Capria counters:

- wide top made of furniture board in black, on which you can display a large number of products
- max load of 50 kg
- robust and stable construction made of aluminium tubes with diameter of 32 mm
- fabric with high quality print
- quick and easy installation
- transport bag included

Model	Index	Fabric dimension (width) x (height) x (depth) cm	Weight structure with graphics
Capra	CAP-PSS-SET	156 x 51 x 100	19.2 kg

OVIS

The small, oval conference stand Ovis, will also be a perfect information stand or counter at the trade fair stand. Aluminium construction will withstand loads up to 50 kg. Ovis is a counter based on the Smart Display system, a flexible fabric with graphics is stretched over the metal structure and the print is done using sublimation method. The material has silicone rubber bands, which are clipped onto the counter top.

Advantages of Ovis counters:

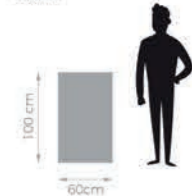

- textile graphics on a flexible fabric
- elegant black furniture board counter top
- maximum load up to 50 kg
- sturdy 32 mm diameter aluminium pipe construction

Transport bag included.

Model	Index	Fabric dimension (width) x (height) x (depth) cm	Weight structure with graphics
Ovis	OVI-PSS-SET	60 x 45 x 100	8,6 kg

Trybunka
Counter

Blat
Table top

OKAPIA

Ideal for use during sampling or for displaying small products. It can also be used as a stand-alone information stand or service or registration point.

Constructed of PVC walls, on which the graphics are glued with foil. An additional extension with graphics will allow to expose the brand logo or information point marking. The PVC countertop is white.

Advantages of the counter Okapia:

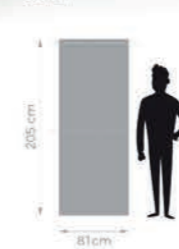

- quick and easy installation
- extension/sign with additional graphics
- spacious locker/shelf inside the counter

Transport bag included.

Model	Index	Fabric dimension (width) x (height) x (depth) cm	Weight structure with graphics
Okapia	OKA-FOL-SET	81 x 205 x 47	11,6 kg

Trybunka
Counter

Blat
Table top

Roll-Up

A roll-up is an extremely universal way to support your promotional activities. It is commonly used to promote any brand in the office, during trade fairs, conferences, promotional events or exhibitions.

The ease of exchanging graphics or transporting the roll-up without any problems, as well as the possibility of adapting this advertising method to any budget, make it an ideal solution also for small businesses, which do not want to invest a lot of money in advertising, but want to be visible at training courses or conferences in which they participate.

It is also very easy to assemble and disassemble.
- After the presentation, the graphic is rolled up to a handy cassette, which makes it easy to store it for next use.

CAIMAN

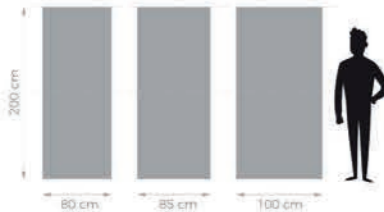

Economical Roll-up

Caiman is an economical version of the rollup, but its presentation does not differ significantly from other models.

Advantages:

- snap-on slat with caps
- the bottom of the graphic attached using adhesive tape
- bungee type mast
- two swivel legs
- mast stabiliser
- economical transport bag, without reinforcements

Model	Index	Fabric dimension (width) x (height) cm	Weight structure with graphics
Caiman	CAI80	80 x 200	2,9 kg
Caiman	CAI85	85 x 200	3,1 kg
Caiman	CAI100	100 x 200	3,3 kg

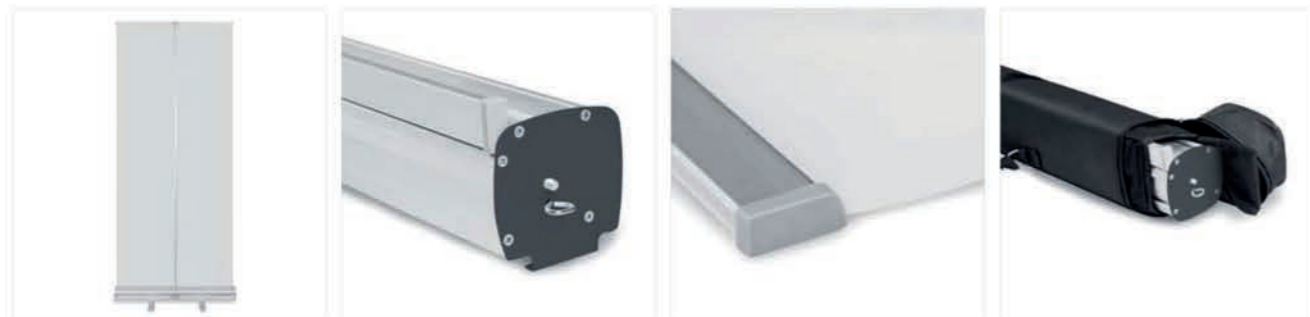

CAIMAN

Roll-ups

TESTUDO

TESTUDO

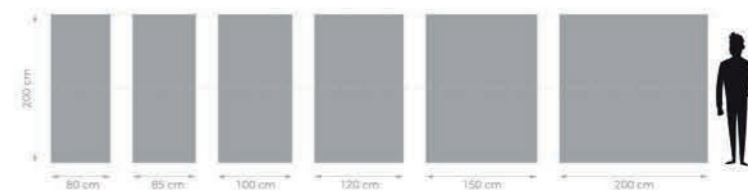

Good quality at a good price

Testudo is a roll-up with a very good price to quality ratio. The roll-up cassette is made of a heavier type of aluminium, which makes it more stable.

Advantages:

- snap-in slat
- the bottom of the graphic attached by means of adhesive tape
- bungee mast
- two swivel legs with plastic trims
- silver cassette
- padded inside, reinforced carrying bag

Model	Index	Fabric dimension (width) x (height) cm	Weight structure with graphics
Testudo	TES80	80 x 200	3,7 kg
Testudo	TES85	85 x 200	4 kg
Testudo	TES100	100 x 200	4,4 kg
Testudo	TES120	120 x 200	5,6 kg
Testudo	TES150	150 x 200	6,4 kg
Testudo	TES200	200 x 200	7,8 kg

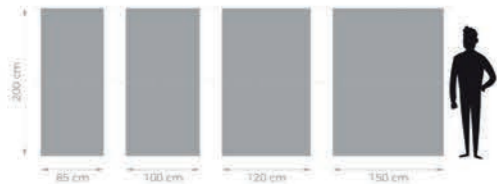

MELES

The Meles model is suitable for intensive and repeated use. The streamlined tear-shaped cassette looks extremely aesthetically pleasing and very practical. The feet on the front of the cassette help level the roll-up. Precise roll up and roll out graphics thanks to a precise cassette mechanism.

Advantages:

- exclusive look
- reinforced graphic snap-in strip
- easy to transport and install
- reinforced cassette with chrome plastic sides
- bungee mast
- front legs of the cassette for better stability
- reinforced, padded carrying bag

Model	Index	Fabric dimension (width) x (height) cm	Weight structure with graphics
Meles	MEL85	85 x 200	5.2 kg
Meles	MEL100	100 x 200	6.2 kg
Meles	MEL120	120 x 200	7.8 kg
Meles	MEL150	150 x 200	9.2 kg

Roll-ups

LACERTE TWIN

LACERTE TWIN

Show your graphics from both sides.

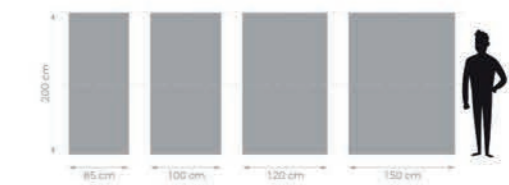

Lacerte TWIN is a roll-up with graphics on both sides. The two-sided roll-up allows you to present two different advertising graphics by placing a double mechanism in the roll-up tape. Two separate masts solidly stabilize the position of the graphics.

Advantages:

- possibility of presenting two graphics at the same time
- snap-on strip with caps
- the bottom of the graphic attached using adhesive tape
- bungee mast
- two swivel legs
- reinforced carrying bag

Model	Index	Fabric dimension (width) x (height) cm	Weight structure with graphics
Lacerte Twin	LAC85	85 x 200	6 kg
Lacerte Twin	LAC100	100 x 200	8,3 kg
Lacerte Twin	LAC120	120 x 200	9,2 kg
Lacerte Twin	LAC150	150 x 200	10,9 kg

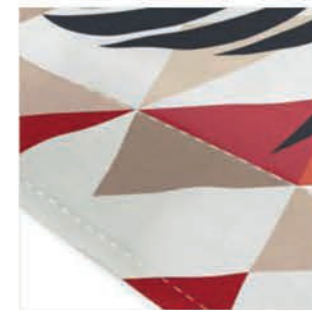

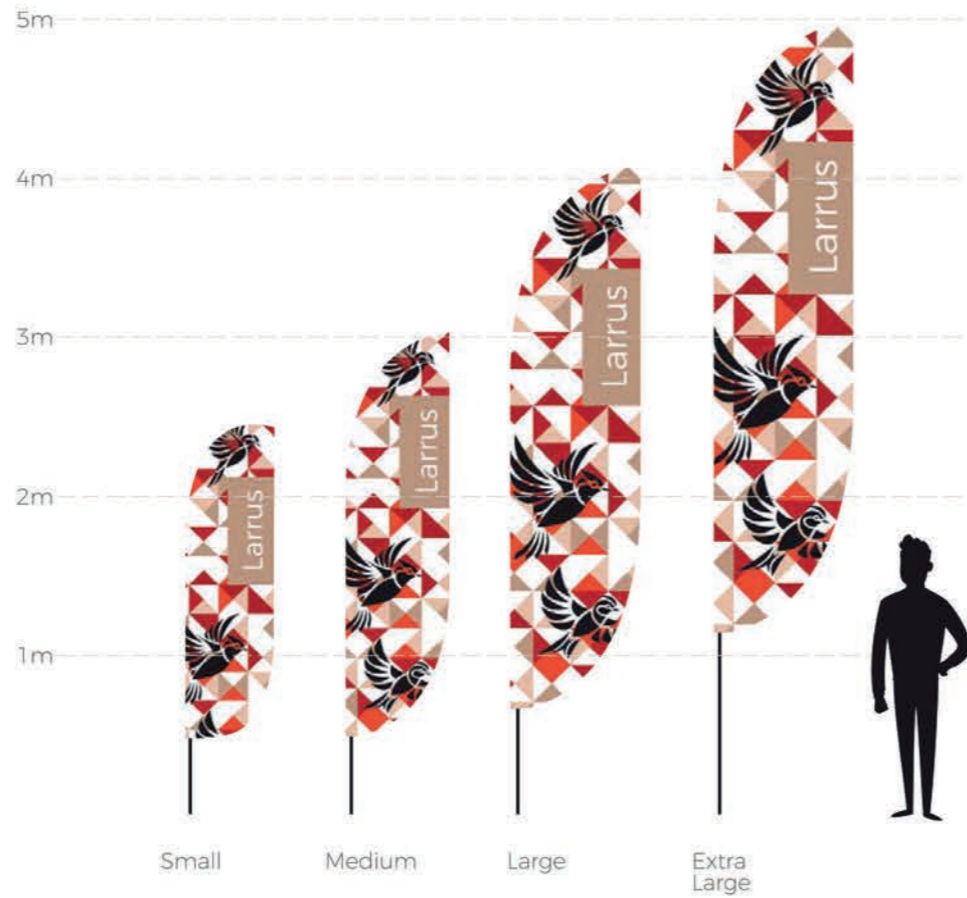

Flags

Flags and advertising sails are an irreplaceable element of visual advertising. They are ideal for placing them in front of the entrance to the company, on the slope, beach or in a corridor in larger spaces. It will be suitable for both outdoor and indoor exposure. Flags can be used for advertising, to show the way to a shopping centre or as landmarks, at mass events. The extensive offer will allow to adjust the solutions to the customer's needs, and a wide range of bases and accessories will allow to set them on different surfaces.

option

LARRUS

The basic shape flag.
 Fiberglass flagpole.
 Thanks to a wide range of bases, the flag can be placed on any surface.

- the popular flagpole made of fiberglass
- flag fixing hook
- resistance tested in the wind up to 29 km/h
- flagpole cover
- additional option: Flag carrier bag

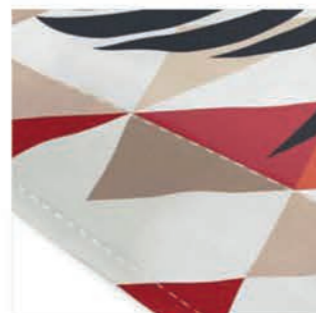

Model	Flag index	Mast index	Flag dimension (width) x (height) cm	Weight of whole kit
Larrus	FLA-L-S	MS-S (2.8 m)	60 x 200	0.7 kg

 Angular base for rotator 45°	BAZ-ROT-K	0,8 kg	Angular base for rotator 45° Enables masts to be fixed to the wall, suitable for sizes 2,8 and 3,6 m mast. It has holes for screws to be screwed in. The kit does not include wall plugs and fastening screws.
 Base Rotator 90° straight	BAZ-ROT-P	0,8 kg	Base Rotator 90° straight Rotator integrated with a cast iron plate that has holes for to fix the base to a hard surface. The kit does not include wall plugs and fastening screws. Fits 2,8 m and 3,4 m masts.

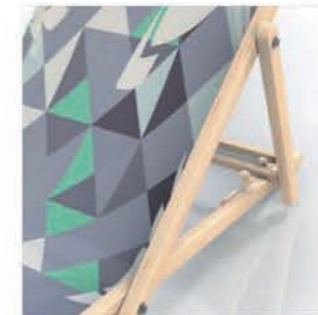

DECKCHAIR

Advertising deckchairs combine both functional and advertising functions and are ideal for events, but also for cafés and office chillout areas. Weather-resistant and extremely durable. The backrest of the deckchair made of strong polyester fabric is ideal for graphics, logos and advertising slogans.

Advantages:

- exchangeable fabric with graphics, resistant to weather conditions
- Robust beechwood construction
- security against uncontrolled folding

Model	Index	Dimension (width) x (height) cm	Weight
Ležak	LEZ-SM-SET	120 x 56	4.2 kg

WINDBREAK

Durable and handy advertising windbreak. Ideal protection against wind or sand. The beach windbreak with personalised printing will be visible from a distance on any beach. You can also use it for outdoor events. Outdoor advertising that attracts customers' attention allows them to get to know your brand.

Thanks to the possibility of using the waterproof Summer fabric, it can be used by the sea, lake or camping site.

Advantages:

- exchangeable graphics on polyester or waterproof Summer fabric
- available lengths of 4 m, 5 m or 6 m
- fabric height with pole 100 cm x 75 cm
- 5, 6 or 7 poles (depending on dimension)
- transport bag

Model	Index	Dimension (width) x (height) cm	Weight
4-Meter windbreak	PAR4	400 x 70	1,1/1,5 kg
5-Meter windbreak	PAR5	500 x 70	1,4/1,8 kg
6-Meter windbreak	PAR6	600 x 70	1,6/2,2 kg

TABLECLOTH

Printed tablecloths are a very interesting form of advertising and the possibility to identify with the brand during external and internal events, such as conferences or exhibitions. Tablecloths with logos can also be used by catering companies or restaurants. Advertising tablecloths are also suitable for hotels, guest houses, catering gardens, banquet halls, wedding halls or conference rooms. Our advertising tablecloths are additionally finished with a folding hem, which adds durability to the material.

Advantages:

- fabric: polyester 210 g
- trimming: folding hem
- sublimation-based printing
- different sizes

TENT 3X3

Advertising tents are an ideal solution for outdoor events, as protection against rain or sunshine or for creating an outdoor exhibition stand.

The sturdy frame is made of light aluminium, which makes the tent easy to install and convenient to transport. We print graphics on polyester fabric using the sublimation technique, which guarantees vivid colours and resistance to weathering.*

Advantages:

- the set includes: a frame, 4 fixing pegs, ropes fixing to the ground, fabric with graphics, transport bag and pannier for sand (35 kg)
- factory fabric available in four colors: white, black, blue and red
- graphic print on each element of the tent possible (walls, half walls, canopy)
- wind resistance up to 28 km/h
- wide range of accessories: bag, weights, rods for mounting the half-walls
- adjustable in height
- quick and easy installation

*To ensure watertightness, it is recommended to use customised printed material. It provides resistance at least 1500 mm of water column.
